SECTION 3 – SERVICE TERMS

1. This service is service is only available for use with Asset Tracking devices from CloudX.
2. Geo fencing and breadcrumbs are dependent on device settings, hardware specifications and the device plan.
3. CloudX will send the Asset Tracking device pre activated with a SIM card and profile configuration in the Asset Management application.
4. You are responsible for the installation of the device to the asset you would like to manage.
5. CloudX will provide the mobile connectivity for the service on the CloudX and its partners mobile network. Note – service availability subject to mobile coverage and operates in New Zealand only.
6. Our Asset Management solution is built, deployed and maintained to provide a high level of security; however we do not offer guaranteed protection from attacks, risks or viruses.
7. Any modifications to the devices will void the warranty. This includes incorrect installation of the device and attaching peripherals.
8. You are responsible for complying with all Privacy requirements in relation to individuals whose information is collected by our Asset Management service, including providing all notifications, and gaining consents required by law.
