

# INTERNET OF THINGS

## CERTIFIED DEVICE LIST

In the table below are the devices that have been certified for use on the CloudX Network.

The modules listed here have been tested by ourselves or partnered network operators through an advanced testing program confirming the devices meet mandatory requirements. Additionally, these devices guarantee compliance with NZ RSM regulations and RCM requirements.

At a minimum, 4G Band 28 support is required, support of additional bands will provide better performance in certain conditions, locations and scenarios.

For questions or certification requests please contact our IoT at [iot@cloudx.nz](mailto:iot@cloudx.nz)

Supplier	Model	Network	VoLTE
